APPLYING RPA TO HANDLING BULK QUANTITY OF FINANCIAL STATEMENT IN PDF FORMAT.

The client

The client is currently operating in Vietnam with more than 200 Shopping Malls and Stores nationwide providing employment and career opportunities for 17,000 employees.

Each day, this retail company has a bulk quantity of financial statements (orders, receipts...) that needs to be input into the managements systems

The requirement

Instead of opening one-by-one the statements file to search and copy relevant data into another template or system, the task should be done automatically by RPA robots.

The outcome

The task is done by robots through 5 standard steps:

- Read automatically all the statement files using *Optical Character Recognition (OCR)* technology.
- Extract necessary information in the file.
- Fill those information into new template or another management systems.
- Do other reports if necessary.
- The financial information will be always ready for other purposes.

Industry: Accounting/ Retail

Benefit:

- **24/7** available
- Human effort reduce **50%.**
- Increase productivity up to **60%**
