

FPT DPS OPTIMIZES THE APPLICATION MANAGEMENT SYSTEMS ON AWS FOR A JAPANESE USED CAR RESELLER

CASESTUDY

The client

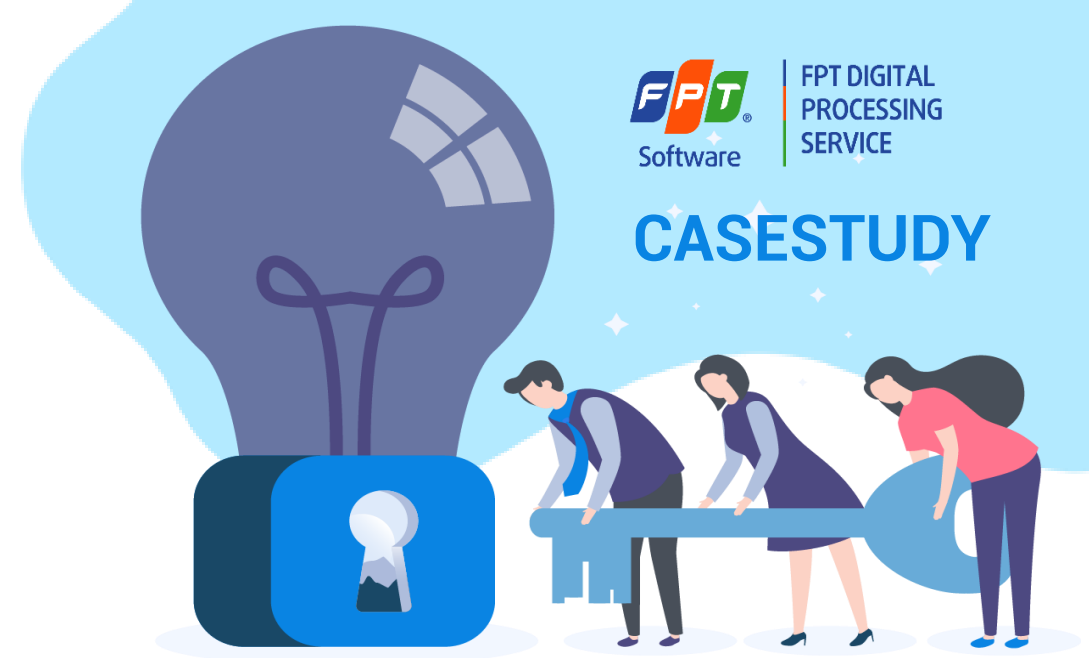

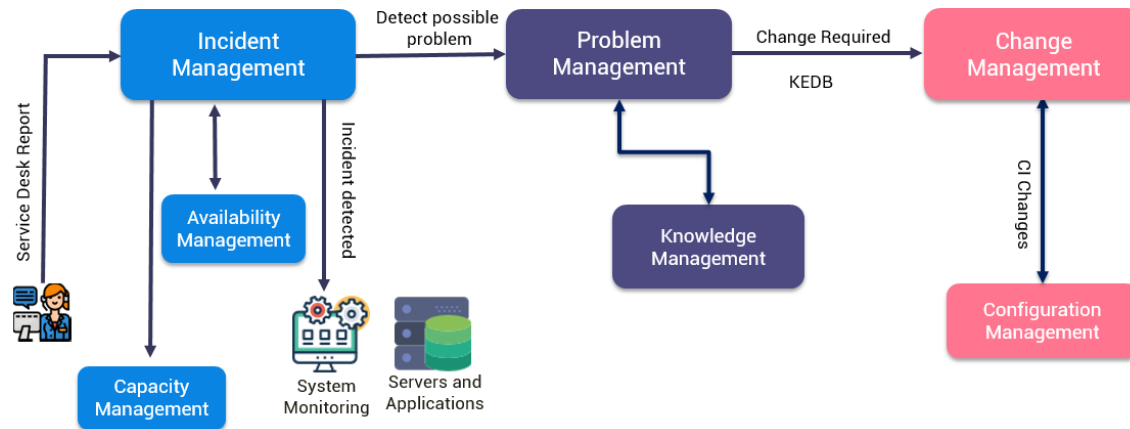

The client is a top used-car dealer in Japan with over 30 years' experience in trading used cars and providing car services. They have a plan to expand 600 stores in Japan and 1,600 stores all over the world.

The requirement

Improve the efficiency of its system operations, which conclude **200 systems** currently operating on a total of **140 AWS servers** with only one vendor.

The outcome

The systems were transfer from three previous vendors and FPT took over **80% of working load** in only 2 years.

Industry: Automotive

Benefit:

- Optimal use of resource
- Capacity sharing
- Different levels of support
- Reasonable cost
